

CRANE LOAD LIMITERS

Available in two versions mechanical/electrical and electronic,
These types of load limiters are attached near the rope anchor point
(dead end) and are simple and easy to install on new or existing cranes and hoists.

Mechanical/Electrical Load Limiter

The mechanical/electrical load limiter is fitted with a microswitch (4amp 250V) and the required load is preset.

Electronic Load Limiter

The electronic load limiter is fitted with a load cell and can be supplied with a control unit for forces up to 10,000kg in a single rope diameter up to 45mm max.

Electronic Autonomous Weighing Hooks

A range of weighing hooks from 60 up to 32,000kg
Digits LCD
Powered using a rechargeable battery
Accuracy +/- 0.1%
Weight indicator in kg or lb.
Battery status indicator
Programmable automatic shutdown

Options

Red Digits (LED)
Infrared remote control with Tare-off
Infrared remote control with memory adding + totalling
Stainless steel casing
Printer
Foundry protection
Max. peak indicator
Transmission of weight via radio to external displays
Transmission to tailor-made solutions
